Skills Summary

Programming and Web Development

Front End Web Development:
- HTML5, CSS3, Bootstrap, JavaScript, ES6, Git, Git Version Control, GSAP

Back End Development:
- Object-Oriented Programming, MySQL, PHP, Node.JS, Express.JS, MongoDB, Postman, RESTful API, AWS Managed Services (s3, Ec2, Lambda, SNS, SQS, SES)

Full Stack Development:
- React.JS, DOM Manipulation, API-Integration, Component-Driven Development (MERN stack)

Other Programming Language

Embedded Systems Development: C/C++

Project Experience

- **Front End Capstone:** Designed and developed Static Website using HTML5, CSS3, Bootstrap and Git for version control, Hosted on GitHub
- **Backend Capstone:** Built and hosted a RESTful API using Node.js, Express.js, and Mongoose with MongoDB, tested endpoints using Postman, and hosted it on a cloud platform.
- **Full Stack Capstone:** Developed a React-based web application featuring API integration and responsive design, leveraging modern JavaScript techniques and DOM manipulation.
- **Other Projects:**
  - **Academic Capstone Project:** Developed a Capstone that automated the process of monitoring our pet dog with an android app using Java for app development, C/C++ for Arduino microcontroller configuration, PHP to send/receive data from XAMPP, our local web server environment.
  - **Smart Irrigation System:** Using C/C++ to configure microcontrollers, proteus for live simulation and blynk cloud for online monitoring of actual sensor data.
  - **Automated CPR Device:** Using C/C++ to automate the process of having to do a manual CPR procedure.

Work Experience

Web Developer Trainee – Zuitt Coding Bootcamp (April 2024 – July 2024)
- o Completed intensive training in front-end and back-end web development.
- o Built and deployed responsive websites using HTML, CSS, JavaScript.
- o Worked on capstone projects, including creating RESTful APIs and full-stack applications.
- o Gained experience in version control (Git), debugging, and web performance optimization.
- o Collaborated with peers in group projects to design, develop, and refine web applications.

Preventive Maintenance Technician – ERTI/Analog Devices Inc. (Aug 2022 - Jan 2024)
- o Our role is to do a checkup and quarterly maintenance on the system/machine that the company uses.
- o These requires critical thinking skills.
- o team-oriented character.
- o and to work under a time pressure.

OJT/Practicum (2022)**:**
  HUAWEI
- o Online practicum sessions which include basics of app development using Huawei's own app development IDE

Education

Zuitt Web Developer Program:
  Main Course Package
  April 2024

BS Computer Engineering
  STI Colleges Lipa
  2018 – 2022

Webinars/Seminars

Front End essentials Bootcamp (OneCodeCamp)
Feb 26, 2024 - March 2, 2024

Zuitt Data Visualization Bootcamp
March 2024

Zuitt Web Developer Program:
AWS Short Course Bootcamp
